

Sun Control

While we all love a sunny day, that golden glow can cause uncomfortable heat buildup and damage your vehicle's interior. Tests show that a good sunshade can keep your vehicle up to 44°F cooler. Custom Accessories offers a great selection of accordion shades, twist-fold shades, roller shades, reflective shades, and window tints to make chillin' easier when the temperatures start to soar.

AUTOSHADE®

AUTOSHADE®

AutoShade brings you plenty of options to keep your car, truck, or SUV cool. Built for easy setup and storage, these portable sun shields come in a variety of styles that can reduce or completely block UV rays.

The collaboration between Black Magic and Custom Accessories has conjured a line of premium window tints and adhesive films that easily eclipse those of the competition for their ability to reduce glare and keep upholstery safe from the sun.

- Window Tint -- Black Magic offers DIY vehicle enthusiasts a variety of options to filter out heat and glare. Additional features such as scratch and fade resistance, as well as easy installation, have made their tints a hit.

- Insta-Cling™ -- Easy-to-install Insta-Cling™ film attaches to windows statically, making it both removable and reusable. Vehicle owners and detailers have become attached to its scratch and fade resistance, as well as how easy it is to install.
